

About the report

The report provides additional information on Bigbank Group's (the Group) risk and capital management according to the disclosure requirements as provided in Part Eight of the Regulation (EU) 575/2013 on prudential requirements for credit institutions and investment firms (Capital Requirements Regulation) and Directive (EU) 2013/36 on access to the activity of credit institutions and the prudential supervision of credit institutions and investment firms (Capital Requirements Directive), as amended by subsequent Regulations and Directives. The Group is subject to the disclosure requirements laid down in Article 433c of the Capital Requirements Regulation.

Detailed information on the risk management strategies and processes is presented in the consolidated Bigbank AS Annual Report 2024 (Annual report). The information provided in the risk and capital management report (Pillar 3) complements the information presented in the Annual report and it is unaudited.

The information is presented as at the reporting date, which is 31 December 2024.

RISK REPORT

Bigbank AS specializes in issuing loans and taking deposits. Historically, the bank has focused on unsecured consumer loans, but in recent years the main growth has been in secured housing loans and corporate loans. The Bank has two business lines: retail and corporate banking. The Bank mainly operates through digital channels. Bigbank has branches in Latvia, Lithuania, Finland, Sweden, and Bulgaria, which all offer similar consumer lending services. The management board of Bigbank AS decided to suspend issuing new loans in the Swedish branch from September 2022 but servicing the existing loan portfolio continues. In addition, all branches offer deposit services. Corporate loans and deposits are available in Estonia, Latvia and Lithuania. Bigbank also provides cross-border deposit services in Germany, Netherlands, and Austria from Estonia. A detailed description of the Group and its operations is given in the Annual report.

Effective risk and capital management is an essential component of the Group's management. It has a crucial impact on the long-term results and sustainability of the business model. Based on its business model, the Group has established risk appetite and target risk profiles for all identified material risks together with processes and measures for assessing and managing the actual risk profile in relation to risk appetite. The risk appetite is the level of aggregated risks that the Group is willing to take according to its business model and within risk tolerance limits, in order to achieve its strategic goals. The target risk profile is based on the defined risk appetite. Bigbank carries out ongoing monitoring and reporting of its risk exposures against the risk limits to ensure that its risk-taking activities remain within the risk appetite. The actual risk profile is reviewed by the Management Board at least quarterly and quarterly summary is presented also to the Supervisory Board. An overview of all material risks is presented in the following table.

Riski type	Risk appetite	Risk strategy in brief
Credit risk	Moderate	The credit risk arises from the Group's direct lending activities and investment activities, where the counterparties have repayment or other obligations to the Group. The Group distinguishes credit risk arising from the loan portfolio (including assets reported outside the statement of financial position), money market operations and the bond portfolio.
		As sub-risks of credit risk, the Group has defined default risk, exposure risk, concentration risk and loan recovery and collateral risk.
		The overall appetite for credit risk is moderate, although it may vary by product and/or country, ranging from low to above average, based on the Bank's strategic plans and objectives. The Group consciously assumes a higher credit risk in the consumer loan portfolio, also issuing unsecured loans.
		In order to mitigate the risks, the Group focuses on a well-diversified consumer loan portfolio, avoiding issuing a significant number of unsecured loans to a single client.
		In the housing loan segment, the Group accepts clients with moderate risk, whose solvency is suitable based on a thorough loan analysis and the loan is sufficiently secured by real estate collateral. In the business loan segment, the Group accepts clients with moderate credit risk, and loans are predominantly secured by real estate. In terms of business loans, the Group is prepared to take on a higher concentration risk and to issue a significant loan amount to one client or group of clients if the loan is secured by strong guarantees. The Group also accepts higher industry concentration risk in its business loan portfolio, while focusing on industries where it has sufficient competence and expertise.

Riski type	Risk appetite	Risk strategy in brief
		The Group is not entirely dependent on external debt collection services or the sale of claims but mans the company's internal debt collection units in the countries where loans are issued. The sale of claims is a normal part of the recovery process and is used when the sale is economically justified and supports the management of NPLs.
Liquidity and funding risk	Moderate	The Group maintains a conservative liquidity risk profile and sufficient liquidity reserves. Maintaining strong liquidity position is one of the main priorities for the Group. The Group shall ensure its ability to meet its obligations on time and in full and to cope with a potential liquidity crisis for as long as possible. One of the main objectives of liquidity management is to maximise profitability and support the Group's core business through proactive and well-functioning asset and liability management, ensuring sufficient liquidity reserves and maintaining access to funding. Profit expectations must not override liquidity requirements. Liquidity management contributes to the Group's profitability, but a clear distinction must be made between liquidity needs and profit targets.
		The Group's financing strategy is to ensure adequate and stable financing of its activities from its own resources and external financing. The Group avoids significant funding risk and balances the risk profile of funding. The main source of funding is retail deposits. Strategic management and the limitation of the structure of assets and liabilities are an integral part of strategic planning. The Group's strategic plans correspond to the actual financing structure and economic forecasts. The funding plan is developed as part of the annual budgeting process. The asset structure and its maturities correspond to the funding structure. The funding programming shall consider the forecast of asset quality and quality. The financing of the (net) loan portfolio shall not rely excessively on short-term wholesale funding. The group's financing from external sources shall be balanced with own capital. Diversification is the key part of the Group's overall funding and liquidity management strategy and concentration of funding and funding counterparties shall be avoided. The origin of the Group's funding sources shall be countries of the European Union. The group shall have a contingency plan in place which defines the actions to be taken should the Group encounter a liquidity shortfall in stressed situation.
		The Group's risk appetite for liquidity risk is low and for funding risk is moderate.
Market risk	Moderate	The Group avoids significant market risks and maintains rather conservative market risk profile. The Group does not take any speculative trading positions nor does provide customer-focused trading activities. The market risk strategy is rather conservative and the risk appetite for market risk is moderate. Within the market risk, the objective of currency risk management is to minimise net open currency positions so that the Group is not too sensitive to exchange rate movements and the potential risk to profits is minimised. Activities that are necessary to support the Group's core business and to hold liquid

assets are preferred. The risk appetite for currency risk is low

The sources of interest rate risk arising from the nontrading activities (IRRBB) are negative changes in loan and/or deposit interest rates. The primary objective is to manage and mitigate the impact of interest rate changes on the Group's net interest income (NII) and economic value (EV), ensuring stability and supporting the Group's long-term profitability and strategic growth goals. This includes diversifying the maturity profiles and revaluation characteristics of both assets and liabilities to minimise risk. In its business model, the Group accepts the financing of assets with a relatively long revaluation period with liabilities with a relatively short revaluation period, where the risk of reversal of the yield curve is covered by higher interest income earned on such assets (e.g. financing fixed rate consumer loans with short-term deposits). For longer-term loan products with lower commercial margins (business and home loans), the strategy is to use floating interest rates to hedge the risk. IRRBB risk appetite is moderate.

The main objective of holding investment properties is to support the Group's core business, diversify revenue sources and support the achievement of the Group's profit target. Risk and return considerations are taken into account. The risk appetite for real estate risk is moderate.

Operational risk

Low

Group keeps a minimal reasonable operational risk level. minimizing potential losses and considering its strategic objectives and the principle of economic efficiency. The Group's risk appetite for operational risk is low. Operational risk consists of different subcategories, such as legal risk, compliance risk, money laundering and terrorist financing risk (part of compliance risk), information and communication technology (ICT) and security risk.

The legal risk management strategy is to minimize exposure to legal disputes by ensuring that the Group's operations and obligations arising from contractual relations comply with legal and ethical standards. The risk appetite for legal risk is low.

The Group's compliance risk strategy is to ensure that its operations comply with applicable laws and regulations. Among other things, the Group undertakes appropriate steps to prevent internal and external fraud and discipline violations. The risk appetite for compliance risk is low.

Money laundering and terrorist financing risk (incl. sanction risk) as part of the compliance risk is defined as the risk that the Group will be used for money laundering and terrorist financing due to weaknesses and mismatches in internal processes. The anti-money laundering and countering the financing of terrorism (AML/CFT) strategy is to avoid risk-taking that cannot be managed. The Group mainly offers simple retail and commercial banking products with a low risk of money laundering and terrorist financing to low-risk private and legal clients resident in the home market, taking into account country-specific

Riski type	Risk appetite	Risk strategy in brief
		risks. Greater risk-taking must be covered by an adequate organisational and IT solution. The risk appetite for money laundering and terrorist financing is low.
		Information and Communication Technology (ICT) and security risk refers to the risk of damage resulting from a breach of confidentiality, disruption of systems and data integrity, incompatibility or unavailability of systems and data, or failure to modify information technology within a reasonable timeframe and at a reasonable cost in the event of a change in environmental or business requirements (i.e. flexibility). This includes security risks arising from inadequate or failed internal processes or external events, including cyberattacks or insufficient physical security. Effective management and control of ICT and security risks is a key element of the Group's risk management and control framework. The risk management strategy shall be based on an overall operational risk strategy, keep ICT and security risk to a minimum at a reasonable level, minimising potential losses and taking into account strategic objectives and. ICT and security risk appetite is low.
Strategic risk	Moderate	The Group controls and reduces risk by implementing an adequate and suitable strategy, that corresponds to the current economic environment and is based on a comprehensive planning process. The Group responds to changes in an adequate and timely manner. The Group's strategic and business risk appetite is moderate.
Reputational risk	Low	The Group avoids reputational risks and situations that could potentially lead to a negative impact on the reputation and an accompanying drop in revenue, or loss of confidence. Management of reputational risk is based on the principle that reputation is an important asset. The Group's reputational risk appetite is low.

In addition to the material risks listed in the table, environmental, social and governance risks (ESG risk) have an impact on the Group's activities. ESG risk is not considered a stand-alone risk as it materialises through traditional categories of financial and non-financial risks (e.g. credit risk, market risk, operational and reputational risks, liquidity and funding risks). Where appropriate, ESG-related considerations shall be included in those aspects of the risk management framework that directly address a specific category of material risk and shall be addressed in the relevant risk policies. Therefore, risk appetite has not been assigned to ESG risk, but its impact must be considered as a risk factor in establishing and addressing the risk appetite for significant risks. The board's role is to ensure that ESG-related risks are incorporated into the overall business strategy, business processes, and risk management processes, reported and regulatory requirements met. All managers of area, branch/subsidiary are responsible for taking ESG risks into account in their area of responsibility/country.

A more detailed description of the risk management framework and material risks is given in Note 5 (Risk and capital management).

In accordance with its business model, the Group's risk profile is dominated by credit risk arising from the loan portfolio, which is the most significant driver of the amount of risk weighted assets. 89.7% of the Group's total risk-weighted exposure amount is related to credit risk. In the consumer lending segment, the Group accepts knowingly higher credit risk by granting unsecured loans. In the housing loan segment the Group accepts only customers whose payment capacity is acceptable based on thorough loan analysis and whose loan is fully secured by real-estate collateral. In the business loan segment the Group accepts customers with moderate credit risk and loans are mostly secured by real-estate collaterals. The credit risk appetite is defined in terms of credit risk concentration (limits for specific client groups, maximum loan size and geographical location), credit quality (expected

credit loss) and the ratio of non-performing loans, in line with regulatory definitions and applicable limits. As of 31 December 2024, the actual credit risk level exceeded the target level being above average.

Operational risk is present across all the Group's activities. The operational risk exposure represents 9.3% of the Group's total risk weighted exposure amount. During 2024, total actual losses due to operational risk amounted to 0.6 million euros, while the capital requirement amount attributable to operational risk was 13.6 million euros as at 31 December 2024. Around half of the operational risk losses were related to external fraud cases, most of which consisted in using a stolen identity while applying for consumer loans or hire-purchase agreements. The Group's strategy is to keep a minimal reasonable operational risk level and to minimise the level of potential losses, considering strategic objectives and the principle of economic efficiency. Risk tolerance is expressed in terms of total actual and potential losses resulting from the operational risk events. The Group's compliance risk strategy is to ensure that its operations are compliant with the respective laws and regulations. The Group's operational risk appetite is low and corresponds to the actual risk profile as at 31 December 2024. The levels of compliance risk, money laundering and terrorist financing risk, and the risk of breach of sanctions were assessed separately. The target risk level of those risks is low and the actual risk levels corresponded to the target levels at 31 December 2024. The Group's risks of money laundering and terrorist financing and breach of sanctions are limited due to a limited and low-risk product portfolio and the fact that services are mainly offered to customers who are residents of the country of the respective business unit.

Market risks predominantly arise from the Group's core business activities and taking market risk is not the Group's main activity. The Group does not take speculative trading positions nor provide customer-focused trading activities. The market risk strategy is to avoid significant market risks and maintain a rather conservative market risk profile. The actual market risk level was moderate at 31 December 2024 and met the target level. The Group treats separately foreign currency risk, interest rate risk in the banking book (IRRBB) and real-estate price risk. Market risk contributes 1.0% to the Group's total risk-weighted exposure amount. Risks related to IRRBB, and real-estate price are covered separately with Pillar 2 capital requirements which are calculated within the ICAAP and established by the FSA as a SREP capital requirement. Market risk is monitored regularly and controlled by setting limits on bond portfolio risk exposures, net open foreign currency risk exposures, interest rate sensitivity of economic value of equity and net interest income.

The primary risk not mitigated with capital and hence not measured in total risk-weighted exposure terms is liquidity risk. Liquidity risk is a material risk for the Group. The liquidity risk appetite is low, and accordingly the Group maintains a conservative liquidity risk profile and sufficient liquidity reserves. Maintaining a strong liquidity position is one of the main priorities of the Group. Liquidity risk management is based on conservative assumptions. The actual liquidity level corresponded to the target level at 31 December 2024. Liquidity risk limits and key risk indicators are set to ensure that the liquidity risk profile of the Group remains within the liquidity risk appetite. At 31 December 2024, the Group had a liquidity buffer in size of 16.7% from the total assets. The Group assesses funding risk separately. The funding risk appetite is moderate – significant funding risks are avoided, and a well-balanced funding risk profile is maintained. The actual risk level corresponded to the target level at the year-end.

Other material risks for Bigbank are reputational, business, and strategic risks. These risks are an essential part of the business model and addressed as part of the strategic and operational planning. The Group's strategy on reputational risk management is to avoid reputational risks and to avoid situations that could potentially lead to a negative impact on reputation and to an accompanying drop in revenue or loss of confidence. The Group's reputational risk appetite is low, and the actual risk profile was also low as of 31 December 2024. The Group's strategy on business and strategic risk management is to control and reduce risk by implementing an adequate and suitable strategy, corresponding to the current economic environment, and based on comprehensive planning process, as well as to respond to changes in an adequate and timely manner. The main risk is related to the rapid growth of the Group. The Group's strategic and business risk appetite is moderate, and the actual level was assessed as moderate at 31 December 2024. Reputational, business, and strategic risks are covered with Pillar 2 capital requirements which are calculated within the ICAAP.

Information on intra-Group transactions and transactions with related parties, which may have a material impact on the risk profile of the Group are disclosed in the Note 35 (Transactions with related parties). As at the reporting date the Bank's loan claims to subsidiaries were 30.7 million euros and loan liabilities to subsidiaries 1.8 million euros.

The key metrics and ratios as well as the related input components are disclosed in the following table according to the requirements of the Capital Requirements Regulation. These metrics form part of holistic risk management across individual risk types in addition to Bigbank's internally used risk metrics.

17 Liquidity coverage ratio (%)*		400.24%	450.72%	403.84%
Net Stak	ole Funding Ratio			
18	Total available stable funding	2,578.05	2,440.30	2,109.7
19	Total required stable funding	1,765.38	1,535.10	1,348.1
20	NSFR ratio (%)	146.03%	158.96%	158.50%

^{*}LCR (%) is calculated based on 12 months weighted average value

Common Equity Tier 1 (CET1) ratio decreased from 14.57% at the end of 2023 to 13.17% at end of 2024, total capital ratio decreased from 19.60% to 18.17% respectively. Tier 1 ratio decreased during a year by 1.13% (from 15.65% at the end of 2023 to 14.52% at the end of 2024). All ratios exceeded the regulatory requirements.

Total risk exposure amount (TREA) increased from 1,494.3 million euros at the end of 2023 to 1,831.9 million euros at the end of 2024 (22.6%).

The leverage ratio fell to 9.58% at the end of 2024 from 10.22% at the end of 2023. The fall was driven primarily by an increase of assets that raised the leverage ratio exposure.

Long-term liquidity risk ratio NSFR has stayed on a stable level throughout 2024. During 2024 the level of average LCR decreased in comparison to the average level in year 2023. The decrease was mainly due to higher outflows related to the increased volume of non-maturity deposits.

Bigbank AS has disclosed this information in accordance with the requirements under Part Eight of the Capital Requirements Regulation. The internal procedure "Principles of Disclosing Information Related to Risk Management (Pillar 3)" establishes the key internal control elements to ensure compliance with the disclosure requirements. The process, including the related principles, roles and responsibilities is documented, reviewed, and regularly updated. Internal controls are implemented in the regulatory reporting process. The Pillar 3 report is signed off by the members of the Management Board.

The Management Board of Bigbank AS approves the adequacy of the risk management arrangements and risk management systems put in place with regard to the Group's profile and strategy.

EU-67	Institution (O-Sii) buffer requirement	-	
EU-67	excessive leverage	1.80%	
68	Common Equity Tier 1 capital (as a percentage of risk exposure amount) available after meeting the minimum capital requirements	6.12%	

Own funds are calculated in accordance with the Capital Requirements Regulation. On the row 2 (Retained earnings) undistributed profit from the previous years is included. On the row EU-5a (Independently reviewed interim profits net of any foreseeable charge or dividend) include the audited net profit of 12 months less expected dividends in amount of 8 million euros. Profit for the reporting period may only be included in Common Equity Tier 1 capital after permission from the financial supervisory authority. In Table 3. EU CC2 profit of the current year includes profit of the full year with no dividends deducted.

SCOPE OF APPLICATION

The information is disclosed according to Article 436 of the Capital Requirements Regulation.

Table 6. EU LI3 - Outline of the differences in the scopes of consolidation (entity by entity)

		Method of prudential consolidation					
Name of the entity	Method of accounting consolidation	Full consoli- dation	Proportion al consoli- dation	Equity method	Neither consoli- dated nor deducted	Deducted	Description of the entity
Bigbank AS							Credit institution
Balti Võlgade Sissenõudmise Keskus OÜ	Full consolidation	X					Administrative and support service activities
AS Baltijas Izaugsmes Grupa	Full consolidation			X			Real estate activities
OÜ Rüütli Majad	Full consolidation	X					Real estate activities
OÜ Rüütli Property	Full consolidation			X			Agriculture. forestry and fishing
OÜ Papiniidu Property	Full consolidation			Χ			Real estate activities
OÜ Pärnu mnt 153 Property	Full consolidation			X			Real estate activities

Group consolidated in the prudential scope consists of the Estonian parent company, its foreign branches and subsidiaries in Estonia and Latvia. Subsidiary companies OÜ Rüütli Property, OÜ Papiniidu Property, OÜ Pärnu mnt 153 Property and AS Baltijas Izaugsmes Grupa do not provide ancillary services according to the Credit Institutions Act and Capital Requirements Regulation and are therefore consolidated using the equity method according to the scope of prudential consolidation, i.e. not applying full consolidation according to IFRS accounting treatment. Companies consolidated under IFRS include all companies controlled by the parent company. The total difference between the Prudential scope of consolidation and consolidation according to IFRS accounting treatment is 8.8 million euros. For details, see Note 2 (Basis of preparation and statement of compliance) of the Annual report.

EU-10	Corporates	151.7
EU-11	Exposures in default	72.7
EU-12	Other exposures (eg equity. securitisations. and other non-credit obligation assets)	91.2

The management of excessive leverage risk is integrated into the Bigbank's risk management framework (including procedures. limits. planning. etc.). Bigbank uses the leverage ratio according to Regulation (EU) No 575/2013 as a main indicator for monitoring excessive leverage risk as well other indicators based on the balance sheet structure. The risk of excessive leverage is considered in strategic planning and shall be assessed and forecasted as a part of capital planning process. The funding shall be arranged in such a way that the necessary funding is reasonably balanced between proportion of external funding sources and Tier1 capital. The aim is to have stable and conservative balance sheet structure. The Finance Area is responsible for managing the risk of excessive leverage as a first line of defence. The excessive leverage risk and balance sheet developments is regularly monitored and reported to the Management Board and Supervisory Board. Management board shall, if necessary, approve an action plan to address changes in the leverage ratio.

The leverage ratio was 9.45% as at 31 December 2024 (10.22% as at 31 December 2023). The leverage ratio is calculated as the ratio of Tier 1 capital to total assets. During the disclosing period the decrease in the leverage ratio was affected by the increase in credit risk exposures resulting from increasing business volumes and the resulting increase in the total risk exposure amount.

OWN FUNDS REQUIREMENTS AND RISK-WEIGHTED EXPOSURE AMOUNTS

The information regarding own funds requirements and risk-weighted exposure amounts is disclosed according to Article 438 of the Capital Requirements Regulation.

Table 12. EU OV1 - Overview of total risk exposure amounts

		Total risk exposure a	amounts (TREA)	Total own funds requirements
in million	FUR	31.12.2024	31.12.2023	31.12.2024

EU23c	Of which advanced measurement approach	-	-	-
24	Amounts below the thresholds for deduction (subject to 250% risk weight)	-	-	-
29	Total	1,831.9	1,494.3	146.6

Bigbank's total risk exposure amount (TREA) was 1,831.9 million euros at the end of 2024, increasing by 337.6 million euros during a year (1,494.3 million euros at the end of 2023). The TREA increase was driven by the increase of credit risk exposure amount due to increased lending volumes. Bigbank uses the standardised approach for calculating credit, market and operational risk own funds requirements.

COUNTERCYCLICAL CAPITAL BUFFERS

Information on the countercyclical buffers is disclosed according to Articles 440 of the Capital Requirements Regulation.

Table 13. EU CCyB1 - Geographical distribution of credit exposures relevant for the calculation of the countercyclical buffer

The Group uses credit assessments by Moody's to calculate risk-weighted exposure amounts for credit exposures to central governments, central banks, public sector entities, multilateral development banks, credit institutions and corporates under the standardised approach. No changes have been made to the corresponding assignments during the disclosure period. Risk weights are determined using the standard association published by the EBA.

INTEREST RATE RISK ON POSITIONS NOT HELD IN THE TRADING BOOK

Information on the interest rate risks of non-trading book activities (IRRBB) is disclosed according to Article 448 of the Capital Requirements Regulation. Additional information on the management of IRRBB is disclosed in Note 5 (Risk and capital management) of the Annual report. Table EU IRRBB1 complements the information disclosed in the Annual report.

Table 27. EU IRRBB1 - Interest rate risks of non-trading book activities

		a	b	С	d	
Supervisory shock scenarios		Changes of the e		Changes of the net interest income		
in million EUR		31.12.2024	31.12.2023	31.12.2024	31.12.2023	
1	Parallel up	-9.0	-12.2	-0.6	-1.0	
2	Parallel down	0.7	3.0	0.3	0.7

	ADJUSTED VALUE									
EU-21	LIQUIDITY BUFFER					523.3	525.7	494.3	406.1	
22	TOTAL NET CASH OUTFLOWS					137.1	123.6	110.3	94.9	
23	LIQUIDITY COVERAGE RATIO					400.24%	431.66%	450.72%	423.90%	

The level of the liquidity coverage ratio (LCR) depends on the dynamics of the liquidity buffer and net cash outflows. In 2024, the LCR remained stable at a high level, exceeding both regulatory and internal thresholds. The last 12 months' weighted average LCR stood at 400.24% at 31 December 2024 (31 December 2023: 403.84%). Over the year, the weighted average liquidity buffer increased from 317.3 million euros to 523.3 million euros, with an increase in the net cash outflow (weighted average value of 79.2 million euros at 31 December 2023 and 137.1 million euros at 31 December 2024).

The Group's funding is primarily based on retail deposits. In addition to retail deposits, the Bank has raised funds through the issuance of subordinated bonds. The concentration of funding sources by counterparty is low. The liquidity buffer consisted largely of funds held with central banks and commercial banks and of high credit quality bonds. The level of the LCR is monitored in euros. Group didn't have any other material currencies (liabilities equal to or greater than 5% of total liabilities) as at 31 December 2024.

REMUNERATION

Information on remuneration principles according to Article 450 of the Capital Requirements Regulation is disclosed in the Annual report.

Table 34. EU REM1 amends the information according to the disclosure requirements. Table 36. EU REM5 gives the breakdown of the remuneration of other identified staff by business areas. The MB Management function includes members of the management board of Bigbank AS and the MB Supervisory function includes members of the supervisory board of Bigbank AS.

The amounts of remuneration provided are gross numbers, including contributions to social security, fixed salaries, variable remuneration and vacation pay.

Table 34. EU REM1 - Remuneration awarded for the financial year
